DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Frey et al. (US 4,860,750).

Frey et al. disclose a connector comprising (see Figures 6 & 10):

a molded part support (50);

a molded part side clamp (60a, 60b) defining a confronting surfaces (61, 62, 63, 53a, see Figure 10), which defines a port and or channels symmetrically disposed about a plane of symmetry (see Figure 10);

a fastener (66, 67, 68).

3. Claims 1-3 and 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kinda et al. (US 5,000,705).

Kinda et al. disclose a connector comprising:

a molded part support (12);

a molded part side clamp (14) defining a confronting surfaces (34) which defines a port and or channel (see Figure 3);

a fastener (16).

4. Claims 1-3, 8-9, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Chung (US 6,339,190).

Chung discloses a connector comprising:

a support (14);

a side clamp (22) defining a confronting surfaces (228) which defines a port and or channel (see Figure 3);

a threaded fastener (20) threadly received a threaded retainer (16) carries by the support (see Figure 2).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Frey et al. (US 4,860,750).

Frey et al. substantially disclosed the claimed invention except for the size of the cross section of one channel is larger than the other.

It would have been an obvious matter of design choice to change the size of one of the cross section to be larger or smaller than the other cross section, since such a modification would have involved a mere change in the size of a component. A change in size is generally

recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Allowable Subject Matter

7. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach a notch at a threaded end of the fastener, and in combination of the remaining limitation of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
